Atrium Refurbishment

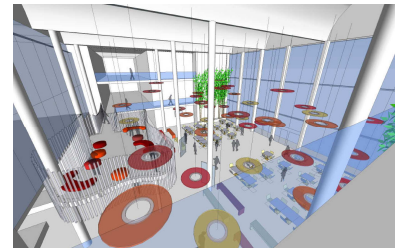

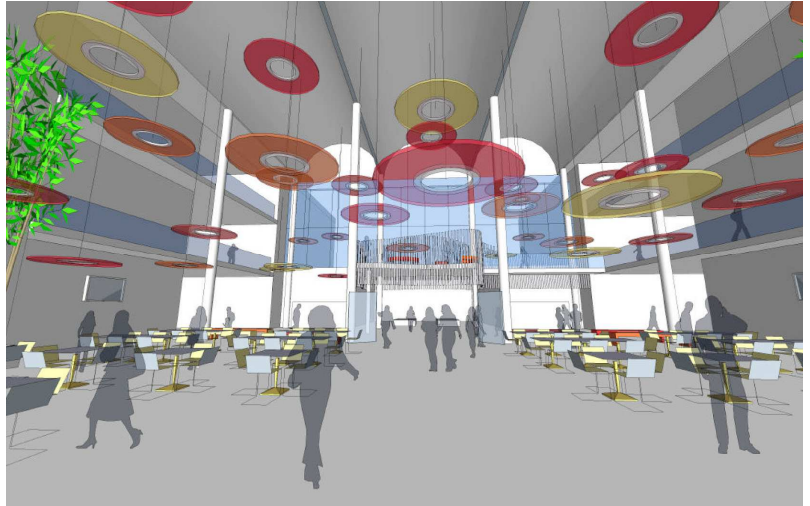

Client
University of Lincoln

Construction Cost
£0.5million

Key dates
Up to RIBA Stage C+ completed

Project Design Team
JMF Chartered Architects

Procurement Route
Traditional

A proposed refurbishment of the main administration building's atrium space overlooking Brayford Pool.

JMF and UoL worked together to generate a design brief; JMF then produced a number of options.

The preferred option responds to the need for more intimacy within the main three-storey space, an improved dining experience and increased profile for the servery. Mobiles provide improved personal space, additional direct lighting and acoustic baffling.

The proposal includes a total upgrade of all finishes to the atrium with an appraisal undertaken to determine the most appropriate furniture selection.
